

Ulysses 1.2.1 – The Quick Fix Update

Changes:

- Editor will now keep scroll position.
- Footnotes, keywords etc. are now indexed in Spotlight.
- Group goals can now be removed using context menu.
- Markdown Quick Export now uses inline-style links.
- External Sources now have a setting to use inline-style links.
- Improved handling of square brackets in External Sources.

Bugfixes:

- Goals now work on Mountain Lion.
- Searching for lists now returns correct results.
- Improved performance when splitting large sheets.
- Dashes are no longer removed from filenames in external sources.
- Fixed crash when setting number of preview lines for sheets to 1.
- Fixed rare problem of duplicated footnotes in PDF export.
- Mouse cursor is now correctly reset when leaving Ulysses window.

- Fixed an issue where some sheets took extremely long to open.
- Lots of other small optimizations and fixes.
